For Renault Samsung Universal Steering Lock Emulator All Models

Renault Steering Lock Emulator Overview:

The Renault steering lock emulator is one of the most advanced ESL emulators currently available.

Renault ESL emulator Support Renault vehicles with 500Kb CAN system & Renault 250Kb CAN system

To use Renault immobilizer emulator for Renault Laguna 2 / Escape steering lock for models 2001-2008 with 250Kb CAN system jumper on Renault universal ESL emulator must be soldered (this is only for Renault Laguna 2 ESL emulator for models 2001-2008)

Renault ESL steering lock emulator is plug and play emulator and it doesn't need adaptation

The Renault ESL module in Renault vehicles is prone to failure and most Renault users get steering lock fault issue but the Renault Samsung Universal Steering Lock Emulator can be used to eliminate the need for costly replacements.

Renault universal steering lock emulator doesn't require coding, simply connect and forget. If you wish to move the Renault Megane steering lock emulator to another vehicle to diagnose a fault then the Renault Megane steering lock bypass emulator can be connected to another car without coding.

The Renault Megane ESL steering lock emulator features a single easy to connect plug to make installation as simple as possible.

For Renault Steering Lock Emulator Light Behavior
 When you short the jumper, the LED will turn green.
