2011-2014 Chrysler | Jeep Grand Cherokee | Dodge Steering Lock Emulator 5026788AD

For Chrysler-Jeep-Dodge Steering Lock Emulator

The car's original steering lock emulator works by coding following the next steps :

1- The vehicle's original steering lock must be in working condition.

2- The jumper in the emulator must be short-circuited.

3- The vehicle's original steering lock is attached, connect the emulator pins to the elv cables on the vehicle.(+ - data)

4- Emulator led red off. When you press the start button in the vehicle, when the ignition is turned on and the original elv is pulled, the emulator's LED will start to flash (programming is successful).
"Turn off the ignition"

5- Remove the emulator and open the jumper.

6- Replace your original steering wheel lock by our emulator.

For Chrysler-Jeep-Dodge Steering Lock Emulator Light Behavior:

Led in emulator:
• Red Power Status
• Red Flash is Emulator Programming with Original ELV

Note:
The vehicle's original steering lock must work precisely.
